

OVERVIEW

Nusaprima Buana Sentosa is a renowned trader and farming company dedicated to sourcing, processing, and distributing a wide range of premium agricultural products. We specialize in dish ingredients including spices, coconut products, cocoa and coffee, as well as fruits and vegetables.

MISSION

Our mission is to provide customers with a diverse selection of sustainably sourced and ethically produced agricultural products. We aim to establish long-term partnerships with farmers, ensuring fair compensation and empowering local communities. By promoting environmentally friendly practices and maintaining stringent quality control measures, we aim to deliver products that exceed customer expectations.

OUR NETWORK

AgriCoop is a dynamic agricultural products cooperative that operates in partnership with 15 reputable manufacturers and collaborates with a network of 100 dedicated farmers. We specialize in sourcing, processing, and distributing a diverse range of high-quality agricultural products. With a strong emphasis on collaboration, sustainability, and community development, we strive to create a positive impact in the agricultural sector.

WHITE CARDAMOM

DESCRIPTION

White cardamom refers to the seeds of the cardamom plant that have been bleached or processed to remove the outer pod, resulting in a pale or white appearance. While the outer pod of cardamom is typically green, white cardamom offers a milder and more delicate flavor profile. It has a slightly sweet and floral taste, with hints of citrus and spice. White cardamom is often used in baking, confectionery, and beverages, such as light-colored cakes, pastries, and white tea blends. Its subtle flavor adds a gentle touch to dishes where a more subdued cardamom presence is desired.

COCONUT SUGAR

DESCRIPTION

Coconut sugar, a natural sweetener derived from the sap of coconut palm trees in Indonesia, offers some nutritional benefits. It contains essential minerals like potassium, magnesium, zinc, and iron, which play a vital role in various bodily functions.

Additionally, coconut sugar provides small amounts of B-vitamins, including thiamine, riboflavin, and niacin, contributing to energy metabolism.

While it is still a form of sugar and should be consumed in moderation, coconut sugar is considered a more nutritious alternative to refined sugar due to its mineral content and lower glycemic index, which means it has a less significant impact on blood sugar levels.

SWEET POTATOES

nusaprima
buana sentosa

DESCRIPTION

Honey sweet potatoes, also known as “ubi madu” in Indonesia, offer numerous health benefits. These vibrant tubers are a staple in Indonesian cuisine and are cherished for their natural sweetness and nutritional value. Packed with vitamins, minerals, and fiber, honey sweet potatoes provide a wealth of benefits to those who include them in their diet.

They are a rich source of antioxidants, which help protect the body against harmful free radicals and reduce the risk of chronic diseases.

The natural sugars present in honey sweet potatoes provide a sustained release of energy, making them an excellent choice for maintaining steady blood sugar levels.

Additionally, the high fiber content aids in digestion and promotes a healthy gut.

MANGOSTEEN

DESCRIPTION

Mangosteen, a tropical fruit native to Southeast Asia, is renowned for its unique and delicious flavor. With a thick purple rind, it reveals sweet and tangy white segments inside. Mangosteen is celebrated for its potential to support digestive health, aid in weight management, promote radiant skin, and strengthen the immune system. This small fruit has captivated fruit enthusiasts worldwide, offering a refreshing and nutritious addition to their diets.

ADDITIONAL INFORMATION

Color	A ripe mangosteen typically has a deep purple or reddish-purple rind
Rind Appearance	Look for a smooth and glossy rind. Avoid fruits with blemishes, bruises, or signs of mold, as they may indicate poor quality or decay. Premium : <5% blemishes Standard : 5% – 20% blemishes
Stem	It should be green and fresh-looking. If it is dry or shriveled, the mangosteen may be past its prime. And it's out of standard quality for export.
Size	A4 : Small, A5 : Medium & A6 : Big

ODD PEANUT

DESCRIPTION

Fried peanuts are a popular snack in Indonesia, known for their irresistible crunch, savory flavor, and packed with protein. They are an excellent source of plant-based nutrition. These crunchy treats also provide healthy fats that support heart health when consumed in moderation. With their high vitamin E content, fried peanuts promote healthy skin and a nutritious diet.

Additionally, their dietary fiber content aids digestion and helps to keep you feeling satisfied. These delectable treats are made with dried fried peanuts until they become delightfully crispy and light. The peanuts are then seasoned with a combination of aromatic spices, such as garlic to create a mouthwatering blend of flavors. This traditional Indonesian snack is enjoyed by people of all ages, whether as a quick pick-me-up during the day or as a tasty accompaniment to a refreshing beverage in the evening.

GREENBEAN COFFEE

DESCRIPTION

Coffee from Java, Indonesia, is highly regarded for its exceptional quality and rich heritage. Java has a long-standing reputation as one of the world's top coffee-producing regions. The coffee beans grown in the volcanic soils of Java exhibit a unique flavor profile that is admired by coffee connoisseurs.

Java coffee is known for its well-balanced acidity, medium body, and nuanced flavors that often include notes of chocolate, nuts, and spices. The coffee is typically processed using the wet-hulling method, which imparts a distinct character to the beans.
